Configure Cypress Testing Framework on Mac

1. **Download Docker**
   Only download Docker if you plan to use Docker to create your REDCap test instance.

   https://download.docker.com/mac/stable/Docker.dmg
   Docker for Mac is known to run on **OSX >= 10.12.**

2. **Download GitHub Desktop**
   https://central.github.com/deployments/desktop/desktop/latest/darwin

   Install Git
   https://git-scm.com/book/en/v2/Getting-Started-Installing-Git

3. **Download Node.js**
   https://nodejs.org/en/download/

4. **Open Terminal**

   Install Cypress Framework

   ```
   cd ~\redcap_cypress\
   npm install
   ```

   Open Cypress Debug Window

   ```
   npx cypress open
   ```

5. **Download Sublime**
   Need a text editor? Consider Sublime.
   https://download.sublimetext.com/Sublime%20Text%20Build%203207.dmg

6. **Configure Cypress on your Machine. Please see the REDCap Cypress Testing Framework README.**
   https://github.com/aldefouw/redcap_cypress
